

# DispatchMVP

INTELLIGENCE DRIVEN

Fully automated, Generative AI SaaS  
solution for trucking companies.

DispatchMVP is an AI-powered dispatch and fleet management platform designed to automate and optimize trucking operations.

Our solution eliminates manual dispatching, improves efficiency, and maximizes profitability for trucking companies, brokers, and fleet managers.

With over 1,450 beta signups and industry recognition, DispatchMVP is set to revolutionize the logistics industry with its official launch in 3<sup>rd</sup> quarter 2025.

# Mission Statement

To revolutionize the trucking industry by providing a fully automated dispatch and fleet management system powered by AI, reducing inefficiencies, and increasing profitability for logistics businesses.

# The Problem

The trucking industry faces several challenges, including:

Inefficient manual dispatching processes

Lack of real-time load visibility

Rising operational costs and driver shortages

Compliance and paperwork bottlenecks

## Our Solution

DispatchMVP offers an end-to-end AI-driven dispatching platform that integrates real-time load matching, automated invoicing, fleet tracking, and compliance management, ensuring seamless and efficient trucking operations.

# Key Features

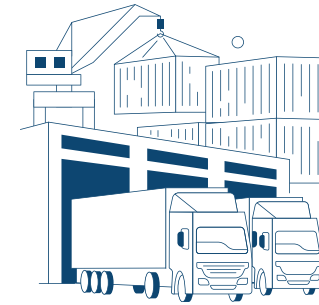

# Market Opportunity

## \$6 Trillion

Global logistics and freight management market size.

## 2,000,000+

Trucking companies in the U.S. alone can benefit from automation solutions like DispatchMVP.

Increased adoption of AI and automation is rapidly transforming the logistics industry.

# Real-World Validation

## DispatchMVP Solves Critical Industry Pain Points

# Target Market

**Trucking Companies**

**Freight Brokers**

**Owner-operators**

# Revenue Model

Subscription-Based  
SaaS Model  
(Monthly/Annual Plans)

Transaction Fees for  
load matching and  
brokerage services

Enterprise Licensing  
for larger fleet  
operations

# Marketing Strategies

Digital Advertising

Strategic Partnership

Social Media Marketing

Trade Shows & Conferences

Referral & Affiliate Programs

# Competitive Advantages

AI-driven automation reduces manual workload and improves efficiency

Scalable SaaS model with seamless third-party integrations

Strong founding team with deep expertise in software development and logistics

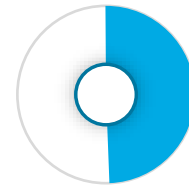

# Ask & Use Of Funds

**\$250k – 500k**

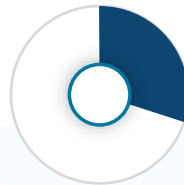

Pre-Seed Investment Required

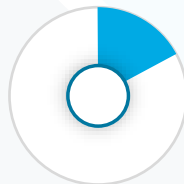

## Use of Funds

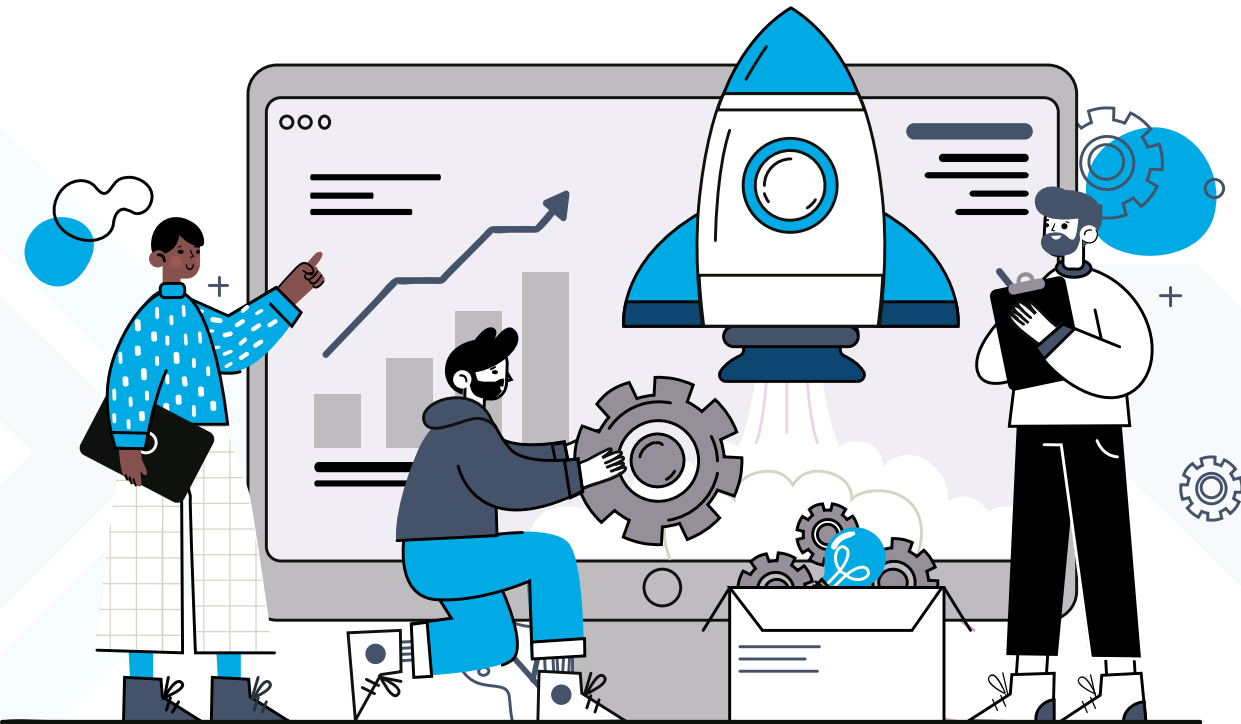

**30%** Product Development & AI Enhancements

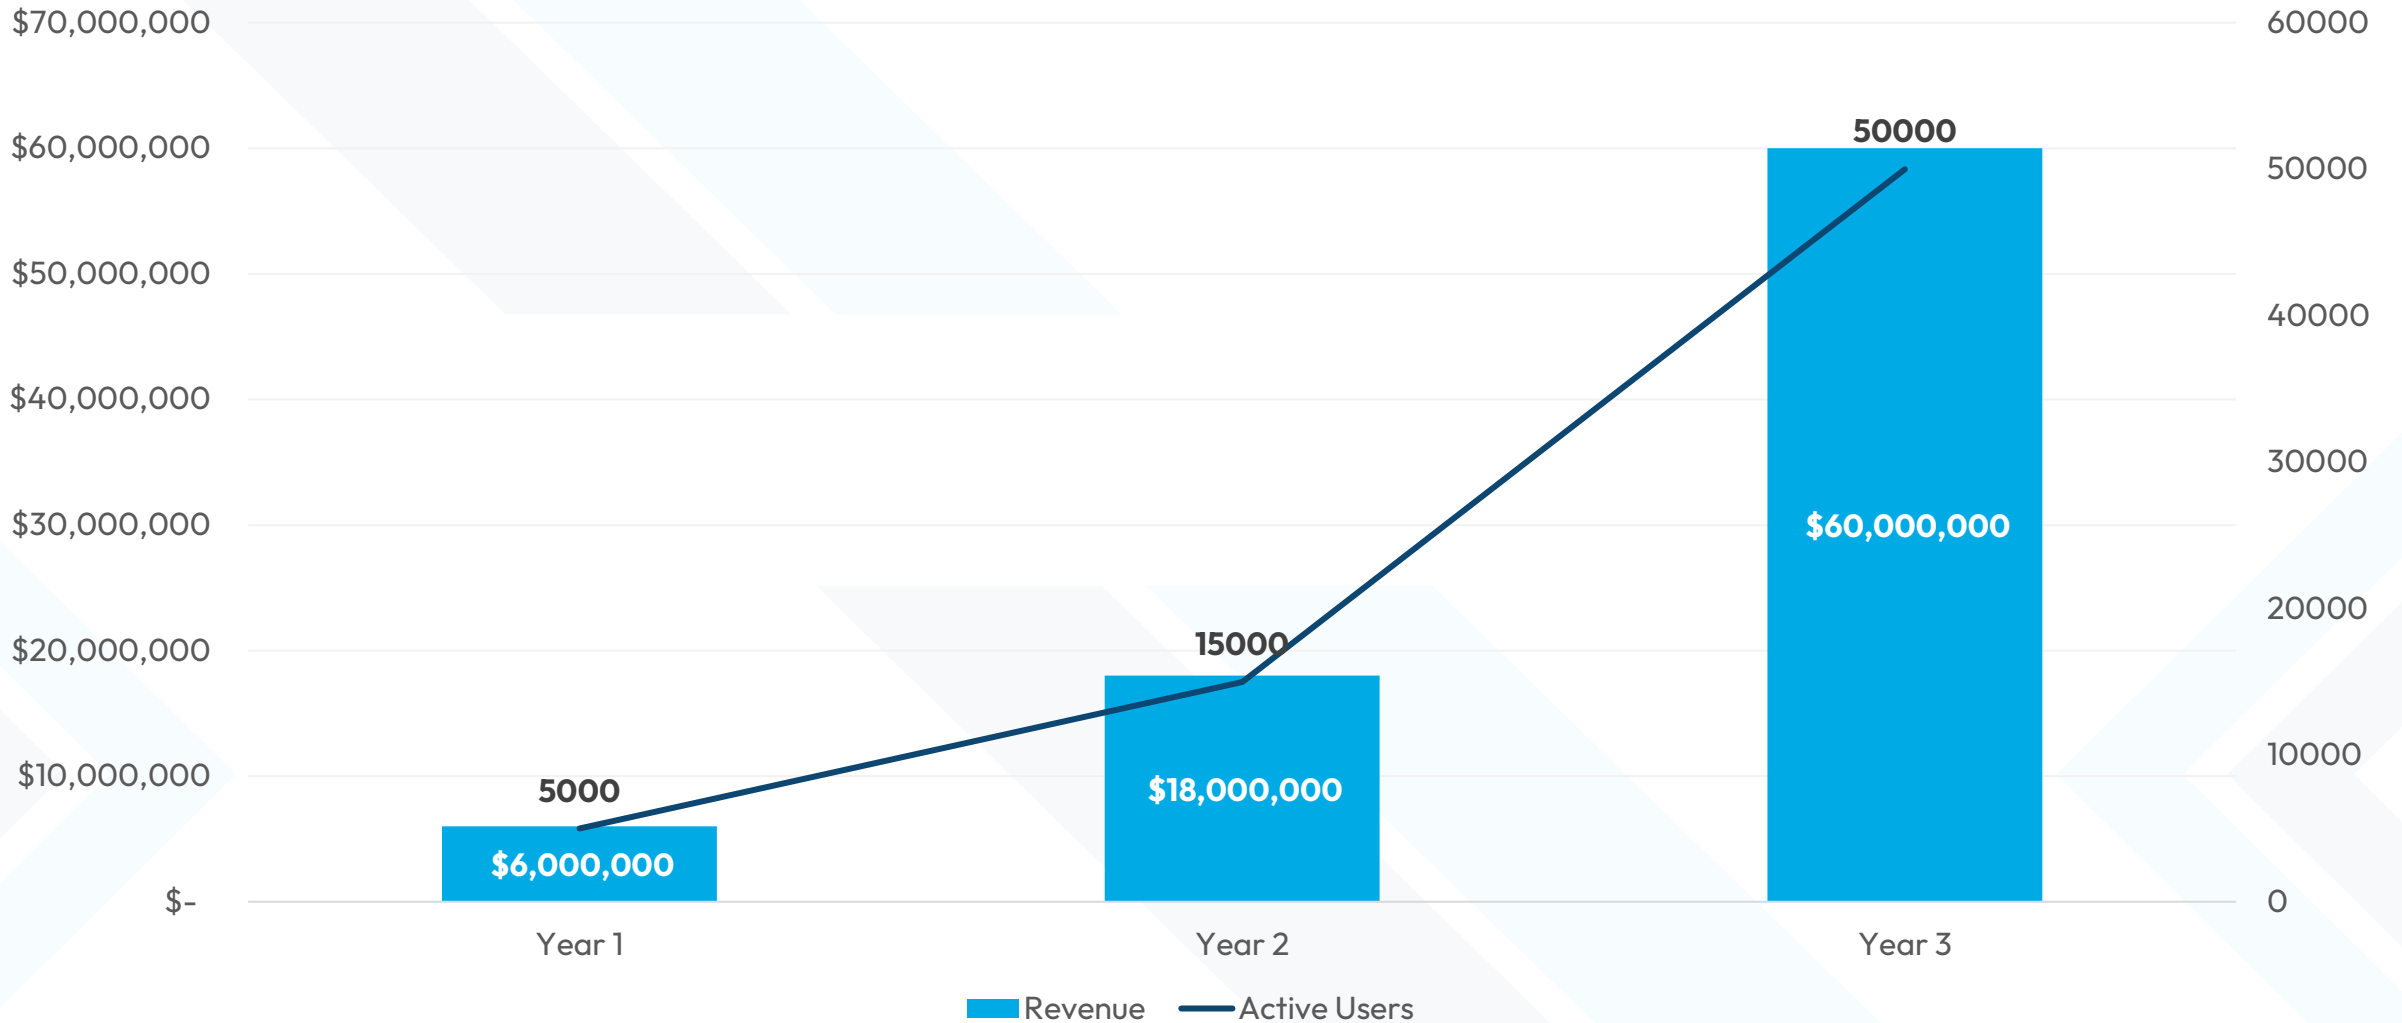

**40%** Marketing & Customer Acquisition

**30%** Operational & Sales Team Expansion

# Financial Projections (2025-2028)

# Exit Strategy

—

Potential acquisition by major logistics software firms

—

IPO within 2-3 years

# Our Team

**Tony Harmon**

Co-founder

27+ years software development (Business & Product Development)

**Ashish Parakh**

Co-founder

16+ years in software & business management

**Nilesh Kumar**

CTO

Expert in cloud & SaaS solutions)

Young Guns Transportation - Industry Development Partners

# Conclusion

DispatchMVP is poised to transform the trucking industry with state-of-the-art AI-driven dispatching and fleet management.

With a growing user base and proven demand, we are ready to scale and capture a significant market share.

**Join us in revolutionizing logistics automation.**
